

DD (IT)

Dear Sir,

As per prebid meeting please amend following queries,

Firewall Queries:

1.The Memory 8Gb is too high as you mentioned throughput is only 500 Mbps. So far that the RAM should be 1GB and also Flash is also 1 GB.

2. Please explain what do you mean by ASDM on Device Management

Server Queries:

1. Please Confirm about the no of Processor either required 1 or 2.

2.Please Confirm about the HBA card do you need the Internal HBA Card or External HBA card and also confirm about the 8GB or 16GB Card Required

UPS queries:

1.For 180amp Osaka battery you have to choose 1kVA or 1.5KVA UPS.

Delivery timeline

Please extend delivery time from 38 days to 38 working days.

For any further queries feel free to contact us.

## **Reply**

Dear Vendor,

Response to all the queries raised by vendors (03) attended and one email received as was discussed on 04-03-2021 pre-bid meeting is as under:-

### **A) Firewall Queries:**

1.The Memory 8Gb is too high as you mentioned throughput is only 500 Mbps. So far that the RAM should be 1GB and also Flash is also 1 GB.

**FEB& GIF Reply:** A minimum combination of **4GB RAM and 1GB Flash** or higher will be acceptable.

2. Please explain what do you mean by ASDM on Device Management

**FEB& GIF Reply:** means **Adaptive Security Device Manager (ASDM)** with following features

Quickly configure, monitor, and troubleshoot firewall appliances and service modules with this user-friendly application. This should offer

- Setup wizards that help you configure and manage firewall devices.
- Powerful real-time log viewer and monitoring dashboards that provide an at-a-glance view of firewall appliance status and health.
- Troubleshooting features and powerful debugging tools such as packet trace and packet capture.

### **B) Server Queries:**

1. Please Confirm about the no of Processor either required 1 or 2.

**FEB& GIF Reply:** 02 Processors are by default provided with the series 3400 advertised so 02 processors are required.

2. Please Confirm about the HBA card do you need the Internal HBA Card or External HBA card and also confirm about the 8GB or 16GB Card Required

**FEB& GIF Reply:** Preferably Internal Host Bus Adopter (HBA) for communicating data among servers is required of 8GB capacity. Compatibility with SATA and SAS both are desired.

### **C) UPS queries:**

1.For 180amp Osaka battery you have to choose 1kVA or 1.5KVA UPS.

**FEB& GIF Reply:** We need 6.5VA UPS so anything compatible in amp will be acceptable.

### **D) Delivery timeline**

Please extend delivery time from 38 days to 38 working days.

**FEB& GIF Reply:** It may be read as 38 working days excluding official holidays as applicable in Federal Government.

### **E) Software Licenses (query received from techaccesspak)**

**FEB& GIF Reply:** For Windows Server: i) Number of Hosts=02, ii) CPUs per Host=02,  
iii) Total Cores per CPU=16, iv) Total # of required Operating System  
Environments (OSEs)=02 (64 bit)

Total Number of User's/CAL's for Exchange Server and Windows Server=120 each

With Regards  
Sayyad Ali Mughal
